REASONS FOR ALLOWANCE

1. This action is in response to the papers filed July 16, 2003. Currently, claims 10, 19, 21-23, 33 and 37-42 are pending.

Maintained Rejections

2. The following is an examiner's statement of reasons for allowance.

Claim 10 has been amended to recite colorectal adenoma or cancer other than glioma. On page 25 and 28 of the instant specification, the specification teaches that regions 1 and 2 were frequently methylated and these 2 regions were methylated in most cancer cell types except gliomas (page 25, lines 16-18). The specification teaches sampling a large number of primary cancers including colorectal, colorectal adenomas, primary gastric cancers and AML samples. Moreover 35 cell lines from colon, lung, prostate, breast and hematopoietic tumors were analyzed. The evidence provided in the specification enables the skilled artisan to amplify either the first or second region of the CACNA1G CpG island with SEQ ID NO: 33-36 and compare and determine methylation as indicative of cancer or colorectal adenoma.

Similarly, as explained in the response, the 5, 6, and 7th regions of the CpG island of CACNA1G showed aberrant methylation in colorectal cancers, colorectal adenomas, gastric cancers and AML (page 27, lines 17-20). The evidence provided in the specification enables the skilled artisan to amplify either the 5th, 6th or 7th region of the CACNA1G CpG island with SEQ ID NO: 41-45 and compare and determine methylation as indicative of colorectal cancers, colorectal adenomas, gastric cancers and AML.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
